Features v1-1

Version 4, last updated by wendy_mason at 2014-11-06

The following outlines features for the 1.1 release

* share arbitrarily large files from a user to one or more other users
* integrates with various authentication mechanisms using SimpleSAMLphp (SAML2, RADIUS, LDAP)
* upload vouchers to allow users without an account to upload a file
* cancel / resume file uploads (using the HTML5 File API in supported browsers)
* download files multiple times, from link with built-in password in auto-generated email, or directly from interface by authenticated user
* automatic deletion of shared files and issued vouchers after X amount of time, or manual deletion by authenticated user any time prior to expiry
* email notification each time a file is uploaded, downloaded or manually deleted, or a voucher is issued or manually deleted
* view lists of currently shared files and unused issued vouchers
* user can resend download link emails to file recipients without re-uploading the file
* add additional recipients to already uploaded files
* UTF8 support, supports all international character sets
* builds on Flash and the HTML5 File API.

FileSender's functionality is also described in End_User_Documentation_for_v1-1.
