

Project infrastructure

Assembla project hosting

Responsible team member: Jan Meijer

Expenses sponsored by: UNINETT

Most of the FileSender project is hosted on assembla.com.

- All documentation
- Code (SVN repository)
- Software tarball distribution
- Bug tickets

We have a paid subscription and use a metered account, paying \$2/month/team member.

Feature requests forum

Responsible team member: Jan Meijer

Expenses sponsored by: free service

The FileSender feature request forum is hosted at <http://www.uservoice.com/>. We currently use the free plan, meaning we have 1 forum that's not branded with our own domain name. Guido Aben and Chris Richter are also admins of this forum.

Domain name registration for filesender.org

Responsible team member: Jan Meijer

Expenses sponsored by: UNINETT

The domain filesender.org is registered via domainnameshop.com (<http://www.domainnameshop.com/>) for 90 NOK/year.

filesender.org name server ns.hyp.net.
```

```
> host -t mx filesender.org
filesender.org mail is handled by 10 dike.uninett.no.
```

Mailinglists

Responsible team member: Jan Meijer

Mailinglists run on the UNINETT mailinglist server. This is a Sympa installation.

Project development platform

Responsible team member: Guido Aben

two virtual machines on AARNet's virtual machine farm, one running Ubuntu Jaunty 64bit, another running Windows Server 2003 (mothballed while the FileSender project develops a Linux-only serverside installation). Running what should be assumed to be unreleased code at any stage -- do not trust the version number displayed.
The Ricoshae development team has direct ssh access and root rights.

Reachable though http/80 (no https for lack of certificate) as
<http://apps3.vetvirtual.org/cloudstor/>

IPv4: 202.158.214.173

IPv6: 2001:388:30bc:cafe:250:56ff:fe84:111b

Expenses sponsored by: AARNet

downloads.filesender.org

Responsible team member: Jan Meijer

virtual webserver that runs on Uninett's webfarm. Content is mirrored from <http://filesender-dev.surfnet.nl/releases> every 15 minutes.

release build platform

Responsible team member: Xander Jansen
