**risk assessment for filesender project**

Version 1, last updated by [meijer](#) at 2012-03-15

This risk assessment covers the FileSender project not the filesender software.

L: likelihood (1 (low) - 4 (high))

C: consequence rating (1 (low) - 4 (high))

R: risk rating

Project infrastructure

Risk	L	Consequence	C	Prevention	Plan B	R
assembla becomes permanently unavaible	1		4	off-site copy of svn tree, assembla backup	It will take a couple of months tops to get someting else up and running. We then need to hire someone to do a "as good as possible" import of tickets and wiki.	
rogue assembla user deletes (chunks of) space						
rogue user inserts security holes in code				svn commit, tree management		

Comments are disabled for this space. In order to enable comments, Messages tool must be added to project. [You can add Messages tool from Tools section on the Admin tab.](#)
