

Feature requests

If you have a feature you would like to see added to FileSender please use our [Feature Request Forum](#). You need to put in a very short summary of your feature plus preferably a longer description. Be as precise as you can be. More votes for your feature means higher priority for the project's roadmap!

If you are unsure exactly how to describe your feature, please use the filesender-dev mailinglist to discuss it with FileSender users and developers :) Instructions for joining the mailinglist and the mailinglist archive location can be found on our [Support and Mailinglist page](#).
