Release 1-1

Version 4, last updated by xjansen at 2011-11-05

Release Version 1.1

Release date: 5 November 2011

Distribution file	MD5	SHA1
filesender-1.1.tar.gz	eb53b92070cb8039e535a71d3d53a5d2	5278babd40a2b4e0f5392dab92aa5fd1f9767c78

filesender-
1.1.zip 9d0133174561edeba72625b33b9b177f 5adcf c9b647041c6af17515a5c99da9ff2be4aa2

Release 1.1 is also available in the [Debian](#) and [RPM](#) package repositories and the [Subversion repository](#). Currently Release 1.1 is distributed from the **testing** repositories. Release 1.1 switched to HTML5 for uploading large files, if you need still need the previous version using the deprecated Gears plugin please use [Release 1-0-1](#).

Installation

See [Installation - Linux Source](#)

Upgrade Notes

When upgrading from a previous beta version (including 1.0(.x) RELEASE) please read the [Upgrade notes](#) before upgrading.

Changes since 1.0.1 RELEASE

- Major change since 1.0.1
- Dropped Gears dependency, upload of large (>2G) files now requires a browser that supports the HTML5 FileAPI, other browsers are limited to 2G uploads using the Flash upload mechanism. This change also obsoletes the following Gears-related issues in 1.0:
 - [#176](#) >2GB upload on MacOS hangs at ~2GB (Gears enabled)
 - [#290](#) File select fails in Linux/Gears for files of 2G or more.
 - [#358](#) Filename accents not displayed in GUI when using Gears

This means that FileSender 1.1 also allows large uploads from the Mac OSX and Linux platforms, provided a supported HTML5 browser is used.

- Note that only user visible references to Gears have been changed. In the code and config.php references to 'gears' are still used. No changes are required in config.php except for the URL pointing to more information on HTML5:

```
$config['gearsURL'] = 'http://html5test.com/';
```

- Minor fixes and changes
 - [revision:993](#) filesender_db.sql: make fileauthuserid character varying(500)
When upgrading from previous versions you should fix the relevant column size in the database with:

```
#sudo -u postgres psql filesender
ALTER TABLE files ALTER fileauthuserid TYPE character varying(500);
\q
```
 - [#563](#) Compare of UID attribute with admin uid broken when attribute is not in an array
 - [#569](#) Case-sensitive references to Files in cron.php
 - [#582](#) Inconsistent file size limit warnings
 - [#583](#) Email addresses rejected at maximum for uploads & voucher issue
- Packaging
 - The Debian package has been adapted to use the default baseurl of the simplesamlphp 1.7+ debian packages which changed from 'simplesaml' to 'simplesamlphp' to adhere to standard Debian policy.

Known issues

See [Known issues in v1-1](#).

Support and Feedback

See [Support and Mailinglists](#) and [Feature requests](#).

Comments are disabled for this space. In order to enable comments, Messages tool must be added to project. You can add Messages tool from [Tools section on the Admin tab](#).
