# Features v1-0

The following outlines features for the 1.0 release

- share arbitrarily large files from a user to one or more other users
- integrates with various authentication mechanisms using SimpleSAMLphp (SAML2, RADIUS, LDAP)
- upload vouchers to allow users without an account to upload a file
- cancel / resume file uploads (using GoogleGears)
- download files multiple times, from link with built-in password in auto-generated email, or directly from interface by authenticated user
- automatic deletion of shared files and issued vouchers after X amount of time, or manual deletion by authenticated user any time prior to expiry
- email notification each time a file is uploaded, downloaded or manually deleted, or a voucher is issued or manually deleted
- view lists of currently shared files and unused issued vouchers
- user can resend download link emails to file recipients without re-uploading the file
- add additional recipients to already uploaded files
- UTF8 support, supports all international character sets
- builds on Flash and Google Gears.

FileSender's functionality is also described in End_User_Documentation for v1-0.
