1.0-Beta 1.14	28 May 2010	22 June 2010	Fixing bugs from beta-1.13 and the Mac bug from beta 1.12
			Fixing security audit results
			Moved all web files in SVN to /trunk/web-app
			Moved all flex files in SVN to /trunk/flex-app
			Move FileSender2.swf file to www/swf/ to allow correct command line compiling
			Update relative include paths for updated structure
			#242 Move config to own folder /config
			#244 restructure svn to support branches and tags
1.0-Beta 1.15	2 August 2010	2 August 2010	Bugs fixed:
			#258 + sign replaced with _ in file name when upoading
			#240 expiry logic: with multiple recipients the shortest expiry wins
			#253 Outdated files in database that misses from disk halts system while removing outdated files
			#241 files, tmpfiles and log directory not present in 1.14
			#211 MyFiles -> Add Recipient: download link in resulting file voucher does not work
			Updated SVN structure
			Moved Flash file to /www/swf/
			Rename flash file filesender.swf
			Fix voucher not sending out correct email message when created
			Update logging to provide client process logging
1.0-Beta 1.16	13 September	29 September	Details php logging

Version	Planned	Released	Changes
1.16	. 2010	. 2010	Typos fixed
			Download changed to use browser download instead of flash download
			Gears upload resume fixed
			Gears Upload temp file handling improved
			Cron job added
			Hostname updated in config
1.0-Beta 1.16.1	unplanned	11 October 2010	Security: proper sanitising of HTML mail sent
			Bug fix: optional message will be shown as is (properly sanitised)
1.0-Beta 1.17	**25 October 2010**	**19 November 2010**	Fixing showstopping bugs.
			Note: this release was postponed until bug #325 (UTF8) was fixed which took up quite some time.
1.0-Beta 1.18	Wednesday 15 December 2010	21 December 2010	bugfixes assumed to be ready around December 8th but Xander the package man is unlikely to have time before Monday 13 December to make the realase available.
			1.18 is assumed to become the RC1. Due to christmas break we will look during the 1st week of January how many installs have deployed 1.18 and how stable that was. For 1.18 to become RC1 two things have to happen:
			1. no show stopping bugs have to appear during field testing
			2. 1.18 has to have been deployed for at least 1 week at AARnet, HEAnet, UNINETT and SRCE.
			1.18 will have fixes for bugs:
			#332
			#274
			#339
			#292
			#338
