Release 1-5-beta1

Version 6, last updated by xjansen at 2012-02-13

```
<div>
```

Release Version 1.5-beta1

Release date: 13 February 2012

Distribution file	MD5	SHA1

filesender-1.5-beta1.tar.gz	ac189f33c446664d1eeb6c0a13444155	5e88f7ed631ea173512a8bfaee44e1a37a0bece9
filesender-1.5-beta1.zip	6a837362bd31a4c792212b3cf6e0dafd	c7b762eaeb6043d9f08f2c4df2d82fffc30aa117

Release 1.5-beta1 is also available in the Debian and RPM package repositories and the Subversion repository. Currently Release 1.5-beta1 is distributed from the **unstable** repositories.

Installation

Documentation for this beta release is not finished yet but is largely the same as fro the previous releases. Exceptions are documented in Installation notes for 1-5 development code .Note that although we have thoroughly tested this beta1 release it is not yet intended for production use.

Upgrade Notes

See Installation notes for 1-5 development code .

Changes since 1.1 RELEASE

```
  * Major changes since 1.1/1.0.1

   - Replaced Flash User Interface with a HTML-only interface
   - Dropped Gears dependency, upload of large (>2G) files now requires
     a modern HTML5 capable browser, other browsers are limited to 2G
     uploads (using a small Flash-application).
   - Added automatic language selection (English, Norwegian, Dutch)
   - Added Database Abstraction Layer (PDO) to facilitate the use
     of MySQL and possibly other databases as backend.

  * Major (visible) changes since earlier 1.5.0 development builds
   - Added French and German languages (contributed by RESTENA)
   - Replaced MDB2 with PDO DB Abstraction Layer

  * Major (less visible) changes since earlier development builds
   - Input/output pathways have been simplified
   - Input/output sanitisation and validation is done
   - Much code and program flow has been cleaned up and simplified
   - We now use mostly prepared statements for database interaction
   - All pages are now W3C compliant
```

Known issues

This is the first beta for 1.5 and there are still some rough edges to be fixed in the next beta2 cycle. See http://www.assembla.com/spaces/file_sender/tickets for a current list of issues.
